

IN THE CLAIMS

Amend the claims as indicated below.

1. (Currently amended) A computer-implemented method for executing electronic transactions, the method comprising:
  - receiving electronic data comprising login credentials from a user and, in response, logging a user into a financial management system;
  - the financial management system receiving a request from the user to access an account, wherein the request includes account identification information and account access information;
  - the financial management system querying the user for user information;
  - the financial management system obtaining data comprising the user information via a network, wherein obtaining comprises obtaining user information from third parties in real-time using the received user information on the user's behalf, the third parties including, a credit reporting; service and a department of motor vehicles;
  - the financial management system authenticating the user's ability to access the account based on the obtained information, wherein authenticating comprises verifying the user's identity by comparing user information received from the user with user information obtained;
  - if the user's identity is not authenticated, querying the user for additional user information and;
  - the financial management system executing a transaction at the request of the user, comprising the financial management system remotely accessing more than one user account at the at least one financial institution and performing a transfer of funds, comprising the financial management system initiating a debit transaction and a credit transaction through an intermediate financial institution distinct from the at least one

financial institution.

2. (Original) A method as recited in claim 1 further comprising determining a risk associated with the user.

3. (Previously presented) A method as recited in claim 1 wherein obtaining user information from third parties comprises harvesting data from a web page accessed using the received user information.

4. Canceled

5. (Previously presented) A method as recited in claim 1 further comprising:

accessing the account; and

handling financial transactions initiated by the user and associated with the account.

6. (Original) A method as recited in claim 1 further comprising handling financial transactions initiated by the user and associated with the account if the user's ability to access the account is authenticated.

7. (Previously presented) A method as recited in claim 1 wherein authenticating the user's ability to access the account comprises verifying one or more of the user's social security number, name, address, phone number, date of birth, and driver's license number.

8. (Previously presented) A method as recited in claim 1 wherein authenticating the user's ability to access the account comprises presenting the user with a challenge question to be answered by the user.

9. (Previously presented) A method as recited in claim 1 further comprising initiating a trial deposit into the account to further authenticate the user's ability to access the account.

10. (Previously presented) A method as recited in claim 9 wherein the account is a financial account.

11. (Previously presented) A method as recited in claim 10 further comprising requesting a cancelled check associated with the financial account to further authenticate the user's ability to access the financial account, and comparing information on the cancelled check with information obtained from third-party sources.

12. (Original) One or more computer-readable memories containing a computer program that is executable by a processor to perform the method recited in claim 1.

13. (Currently amended) A computer-implemented method for executing electronic transactions, the method comprising:

receiving electronic data comprising user login data to login to a financial management system;

receiving financial account access information from the user regarding at least one user account owned by a user at a ~~at least one~~ financial institution;

querying the user for information regarding the user account;

obtaining data comprising information regarding the user account via a network from a financial data source;

authenticating the user's ability to access the financial account based on the obtained information, comprising comparing the information received from the user in response to the query to the information obtained from the financial data source,

wherein the financial data source is a third party separate from the at least one financial institution;

verifying a user identity based on credential information provided by the user, wherein verifying comprises comparing information previously received from the user with information obtained from a third party, wherein obtaining comprises accessing third party data stores using the credential information on the user's behalf, and wherein the third party comprises a credit reporting agency; and

executing a transaction at the request of the user, comprising the financial management system remotely accessing more than one user account at the at least one financial institution and performing a transfer of funds, comprising the financial management system initiating a debit transaction and a credit transaction through an intermediate financial institution distinct from the at least one financial institution.

14. (Original) A method as recited in claim 13 further comprising determining a risk associated with the user.

Claims 15 and 16 Canceled

17. (Original) A method as recited in claim 13 further comprising handling financial transactions initiated by the user and associated with the financial account.

18. (Original) A method as recited in claim 13 further comprising handling financial transactions initiated by the user and associated with the financial account if the user's ability to access the financial account is authenticated.

19. (Previously presented) A method as recited in claim 13 wherein authenticating the user's ability to access the financial account comprises verifying one or more of the user's social security number, name, address, phone number, date of birth, and driver's license number.

20. (Previously presented) A method as recited in claim 13 wherein authenticating the user's ability to access the financial account comprises presenting the user with a challenge question to be answered by the user.

21. (Original) A method as recited in claim 13 further comprising initiating a trial transfer to further authenticate the user's ability to access the financial account.

22. (Original) A method as recited in claim 13 further comprising requesting a cancelled check associated with the financial account to further authenticate the user's ability to access the financial account.

23. (Original) One or more computer-readable memories containing a computer program that is executable by a processor to perform the method recited in claim 13.

Claims 24-72 Canceled
